

# Colour Atlas of Medicinal Plants

(Vol. 1 & 2)

Proper identification of medicinal plants is still a great problem at this time. It has also drawn the attention from common men in general and scholars in the medical streams. In the light of the above, the curiosity about the sources of the medicines, medicinal plants in most of the cases, has drawn considerable interest among all quarters of the medical science. In addition, in the absence of proper knowledge related to the identification of medicinal plants, many plants remained either unidentified or wrongly identified. In this book, an attempt is made to fill the above identified gaps. It is my firm belief that this book will be of immense use to Ayurveda experts, teachers, students of post-graduates and undergraduates Ayurvedic courses, researchers, students of botany, scientists, pharmacologists, pharmaceutical organizations, pharmacists, biochemists, medical men and even common men.

# Ayurveda Question Bank for AYUSH NET Ph.d.

Introduction of AYUSH Ph.D. Fellowship/Senior Research Scheme is a welcome move in enhancing the credibility of AYUSH systems of medicine. It provides a suitable platform for advance studies after post graduation i.e. M.D. degree. Based on topics prescribed for Ayurveda portion, an attempt has been made to create question bank based on multiple choice questions (MCQs) for aspiring students appearing in the entrance examination for AYUSH Ph.D. Fellowship scheme. More than 500 questions have been selected related to priority areas of research have been included in the question bank and shall be expanded in near future based on the market feedback.
