

The book cover features a dark background with several orchid species. At the top, there are close-up images of pink and white orchids. A vertical strip on the left shows a sequence of small white and yellow orchids. The bottom left and right corners show clusters of small purple and white orchids respectively.

## About the Author

**Dr. Kothareddy Prasad** obtained his M.Sc. (2008) and Ph.D. (2013) degrees in Botany from Sri Krishnadevaraya University, Ananthapuram. He was worked as a Post Doctoral fellow (SERB-DST, under young scientist scheme) at Botanical Survey of India, Deccan Regional Centre (2014-2017). At present he is working as AJCB-PDF at Central National Herbarium, Botanical Survey of India, Kolkatta since June 2017. Dr. K. Prasad has published 30 research papers in national and international journals. He described

one new genus and 15 species new to science.

**Dr. S. Karuppusamy** obtained his M.Sc. (1996) degree from Madurai Kamaraj University and Ph.D. (2002) from Gandhigram University, Tamil Nadu. He was a Post-Doctoral Fellow at Sri Krishnadevaraya University (2000-2004). At present he is working as Assistant Professor, Department of Botany, The Madura College, Madurai since 2008. He has published 120 research papers and five books. He is the recipient of Young Botanist Award from Indian Botanical Society (2006). He received Prestigious Prof. Y.S. Murthy

Gold Medal of Indian Botanical Society in 2013. He is also a recipient of Rolla S. Rao award and Fellow of Association for Angiosperm Taxonomy (FIAT) from Indian Association for Angiosperm Taxonomy. He is the Principal Investigator of major research projects funded from UGC, New Delhi and SERB, New Delhi.

**Prof. T. Pullaiah** obtained his M. Sc. (1973) and Ph. D. (1976) degrees in Botany from Andhra University. He was a Post-doctoral Fellow at Moscow State University, Russia, during 1976-1978. He joined Sri Krishnadevaraya University as Lecturer in 1979 and became Professor in 1993. He held several positions in the University as Dean, Faculty of Life Sciences; Head, Department of Botany; Chairman, Board of Studies in Botany; Head, Department of Sericulture; Co-ordinator and Chairman, Board of Studies in Biotechnology;

Principal, Sri Krishnadevaraya University College. He retired from active Service in 2011 and was selected by UGC as UGC-BSR Faculty Fellow in the Department of Botany, Sri Krishnadevaraya University. He has published 73 books, 330 research papers and 35 popular articles.

# PREFACE

Orchids, the “Jewels” of plant kingdom, attracted the attention of both specialists and amateurs because of their beauty and complexity. The family Orchidaceae, is the most diverse family and account for eight percent of all flowering plants and majority are found in the tropics and subtropics. Orchids are generally forest living and prefer to grow in humid tropical climate. They were exploited till the end of last century ruthlessly for cut flowers and this has led to their inclusion in the Appendices I and II of CITES. In India, the family Orchidaceae is the one of the largest family and represented by about 1331 taxa and about 400 are endemic. India is phytogeographically divided into three regions namely, Peninsular India, Himalayan region and Andaman Nicobar Islands. Peninsular India is again divided into three regions namely: The Western Ghats, Deccan Peninsula and The Eastern Ghats.

The Eastern Ghats or Purva Ghat, also known as Mahendra Parvatam, are a discontinuous hill range of mountains running parallel to the Bay of Bengal. The Eastern Ghats encompass different types of vegetation and support rich Orchid flora. In the Eastern Ghats orchid species are at present in great danger of depletion and erosion due to natural threats like climate change (unusual rains, floods, temperature, and soil erosion), natural competition between species (native species and invasive species), lack of pollination (effect on seed formation) and natural degeneration *etc.* while man-made threats include forest encroachment, mining activity, developmental activities, annual forest fires, grazing, illegal trade *etc.* Having realized the said issues there is an urgent need to document orchids in Eastern Ghats and publish in a book form. At present there is no comprehensive account for Orchid flora of the Eastern Ghats. Authors taking note of this lacuna attempted to provide complete information supported by colour photographs.

We thank the authorities of Central National Herbarium (CAL), Howrah; Madras Herbarium (MH), Coimbatore; Deccan Regional Centre (BSID), BSI, Hyderabad; Forest Research Institute Herbarium (DD), Dehra Dun; authorities of Herbarium, Department of Botany, Sri Krishnadevaraya University, Anantapur; Rapinat Herbarium, Tiruchirappalli; Regional Plant Resource Centre, Bhubaneswar for permission to consult the Herbarium and Library. We thank to Dr. P. Singh, Director, Botanical Survey of India, Kolkata for support. We are

thankful to Dr. M. Sanjappa, Dr. P. Venu and Dr. P.V. Prasanna, Scientists of Botanical Survey of India for their constant encouragement. Dr. K. Prasad would like to express his gratitude to the Director of Botanical Survey of India and SERB-DST, New Delhi for the Post Doctoral Fellowship.

We hope this can be source book for field identification and taxonomic research. Readers are requested to bring out deficiencies and mistakes, if any, so that they can be rectified during further editions.
