Acknowledgments

The Fish and Wildlife Service of the United States Department of the Interior, particularly as represented by its Branch of Wildlife Research, deserves credit for making this manual possible. It contracted for the extensive series of photographs, made available the outstanding seed collection at its Patuxent Wildlife Research Center, Laurel, Maryland, and aided substantially in other ways.

Special acknowledgment is also due Arnold L. Nelson, formerly Director of the Patuxent Wildlife Research Center. His name might well have been included in the authorship because of valuable consultation given during all phases of the work and because his active interest brought essential financial support.

Thanks are also given to many individuals who helped with various aspects of the undertaking.

ALEXANDER C. MARTIN
WILLIAM D. BARKLEY

Contents

Introduction	1
Seed Photographs	7
Farmlands	
Weeds, Arranged Systematically (Weeds I), 9	
Weeds, Arranged by Physical Features (Weeds II), 47	
Crops, 73
