Preface

Development of entrepreneurship among women is a major step to increase women participation in the process of economic development. It will speed up economic growth, and provide employment opportunities for women resulting in improving the economic independence. Provision of economic opportunities for women can also improve the social, educational and health status of women and their families.

The hidden entrepreneurial potentials of women have gradually been changing with the growing sensitivity to the role women play and their economic status in the society. The participation of women in economic activities is necessary not only from a human resource point of view but also is essential even from the objective of raising the status of women in the society. The economic status of women is now accepted as an indicator of a society's stage of development and therefore, it becomes imperative for the government to frame policies for development of entrepreneurship among women.

The role of farm women entrepreneur in economic development is also being recognized and steps are being taken to promote agro enterprises. Resurgence of agro entrepreneurship is the need of the hour emphasizing on educating and acquiring skill through trainings, spreading awareness and consciousness amongst farm women to outshine in the enterprise field, making them realize their strengths. Women entrepreneurship must be moulded properly with entrepreneurial traits and skills to meet the changes in trends, challenges in global markets and also be competent enough to sustain and strive for excellence in the entrepreneurial arena.

Though there are several agro enterprises available to farm women, selection of enterprises depends on the availability of raw materials, scope for sustaining and establishing market network. This book gives the broad idea about the importance of such enterprises in national and global level, the critical areas in which farm women

require training and the strategies to combat the constraints in establishing agro enterprises.

This book will serve as a guide for the farm women engaging in agro enterprises and will also be highly useful as a reference material to the scholars and scientists who have been involved in the process of entrepreneurial development.

AUTHORS

Contents
