Contents

List of Figures	v
List of Tables	vii
Introducing the Agricultural Chemical Users' Manual	1
Section 1 Controlling agricultural pests	3
Section 2 Pest biology	7
Section 3 Agricultural chemical classification	21
Section 4 Product formulations	25
Section 5 Product labels	34
Section 6 Product safety, transport, storage and disposal	45
Section 7 Managing agricultural chemical resistance	57
Section 8 Spray and other application technologies	62
Section 9 Spray application equipment	83
Section 10 Agricultural chemical drift management	105
Section 11 The law and agricultural chemicals	121
Appendix A Herbicide modes of action groups	128
Appendix B How to manage herbicides with different modes of action - some examples	131
Appendix C Avcare groups (modes of action) for managing herbicide resistance	135
Appendix D Modes of action of insecticide groups	138

Appendix E	Avcare Insecticide Resistance Action Committee (AIRAC) modes of action classification for insecticides	144
Appendix F	Fungicidal modes of action groups	148
Appendix G	Avcare fungicidal modes of action and activity groups	151
	Glossary	155

LIST OF FIGURES

Figure 2.1	Examples of stolons and rhizomes	09
Figure 2.2	Examples of tubers (left) and corms (right)	10
Figure 2.3	Basic plant structure and vascular system	12
Figure 2.4	Example of an insect life cycle showing complete metamorphosis	16
Figure 5.1	Example of a typical product label	34
Figure 8.1	Diagrams of droplet formation from liquids	64
Figure 8.2	Diagrams of droplet formation using spinning discs	65
Figure 8.3	Diagram of the volume median diameter (VMD)	66
Figure 8.4	Diagram of the number median diameter (NPIfD)	66
Figure 8.5	Diagram showing the effect of target dimension on droplet capture	70
Figure 8.6	Diagram showing the effect of Target dimension (fine hairs) on droplet capture	70
Figure 8.7	An example of a classification scheme used by a commercial supplier to define spray quality	71
Figure 8.8	Examples of hydraulic nozzles	74
Figure 8.9	Wind gradient and generation of rotational eddies	78
Figure 9.1	Vehicle-mounted boom spraying unit	84
Figure 9.2	Self-propelled boom spraying unit	85
Figure 9.3	Hand-held compression spraying unit	85
Figure 9.4	Common boom spraying unit components	88
Figure 9.5	Air inlet measurement pattern	96
Figure 9.6	The entrainment factor in orchard tree spraying	99

Figure 10.1	Awareness zone establishment and sensitive area identification	107
Figure 10.2	Example of field splitting	109
Figure 10.3	A no-spray area between the area to be sprayed and the sensitive area	110
Figure 10.4	An anemometer	112
Figure 10.5	Ideal direction of travel when spraying relative to wind direction	112
Figure 10.6	Whirling psychrometer	114
Figure 10.7	Basic guide to air stability	115
Figure 10.8	Release height	116
Figure 10.9	Air blast spraying unit	118

LIST OF TABLES

Table 5.1	Signal heading statements and the toxicity level indicated	38
Table 6.1	Rates of absorption relative to the forearm (rated 1)	48
Table 6.2	Personal protective equipment (PPE)	49
Table 6.3	Conventional toxicity grades	51
Table 6.4	Waste management hierarchy	56
Table 8.1	The relationship between droplet number, volume and ground coverage	67
Table 8.2	Sedimentation velocity for different droplet sizes	69
